

Please amend the claims as follows:

1. (original) A system for displaying images, wherein

- a mobile apparatus (14) is wirelessly connected to an image display apparatus (12),
- the mobile apparatus (14) controls a reproduction unit (22) of the image display apparatus (12) in such a way that images are displayed by a display unit (24) of the image display apparatus (12), and
- a representation of an image displayed by the display unit (24) is transmitted to the mobile apparatus (14) in which it is displayed by a display unit (18).

2. (original) A system as claimed in claim 1, wherein

- the reproduction unit (22) is provided for reproducing data in the form of a presentation comprising a plurality of consecutive images,
- the mobile apparatus (14) predetermines the transition from one image to the next.

3. (currently amended) A system as claimed in ~~any one of the preceding claims~~ claim 1, wherein

- the image display apparatus (12) is connected to a network (32, 16), and
- the mobile apparatus (14) transmits an address of data within the network (32, 16) to the reproduction unit (22),
- the reproduction unit (22) reads in the data via the network (16, 32).

4. (original) A system as claimed in claim 3, wherein

- the data are stored in the mobile apparatus (14) or in a further apparatus (34) connected to the network.

5. (currently amended) A system as claimed in ~~any one of the preceding claims~~claim 1, wherein

- the reproduction unit (22) is controlled in such a way that the images of a plurality of presentations are simultaneously displayed on top of each other and/or side by side.

6. (currently amended) A system as claimed in ~~any one of the preceding claims~~claim 1, wherein

- the image display apparatus (12) is wire-connected to a network (32).

7. (currently amended) A system as claimed in ~~any one of the preceding claims~~claim 1, wherein

- the mobile apparatus (14) at least comprises the display unit (18), a memory, a central unit and input means (18, 20).

8. (currently amended) A system as claimed in ~~any one of the preceding claims~~claim 1, wherein

- the display unit (24) comprises a device for projecting an image on a projection face.

9. (currently amended) An image display apparatus for use in a system as claimed in ~~any one of the preceding claims~~claim 1, the apparatus comprising

- a reproduction unit (22) for processing presentation data and for generating images therefrom, and
- a display unit (24) for displaying the images,
- a wireless interface (26) for inputting and outputting data,

wherein the image display apparatus is designed for a representation of an image displayed by the display unit (24) is generated and outputted via the interface (26).

10. (original) A method of displaying images, wherein

- a reproduction unit (22) of an image display apparatus (12) is controlled by a mobile apparatus (14) in such a way that images are displayed by a display unit (24) of the image display apparatus (12), and
- a representation of an image displayed by the display unit (24) is transmitted from the image display apparatus (12) to the mobile apparatus (14) in which it is displayed by a display unit (18).
